

This mission statement is binding
for all corporate divisions.

Corporate mission statement

Mission statement

Together with our business partners, we are working to construct a successful circular economy.

For a world with less waste and more recycling.

Vision

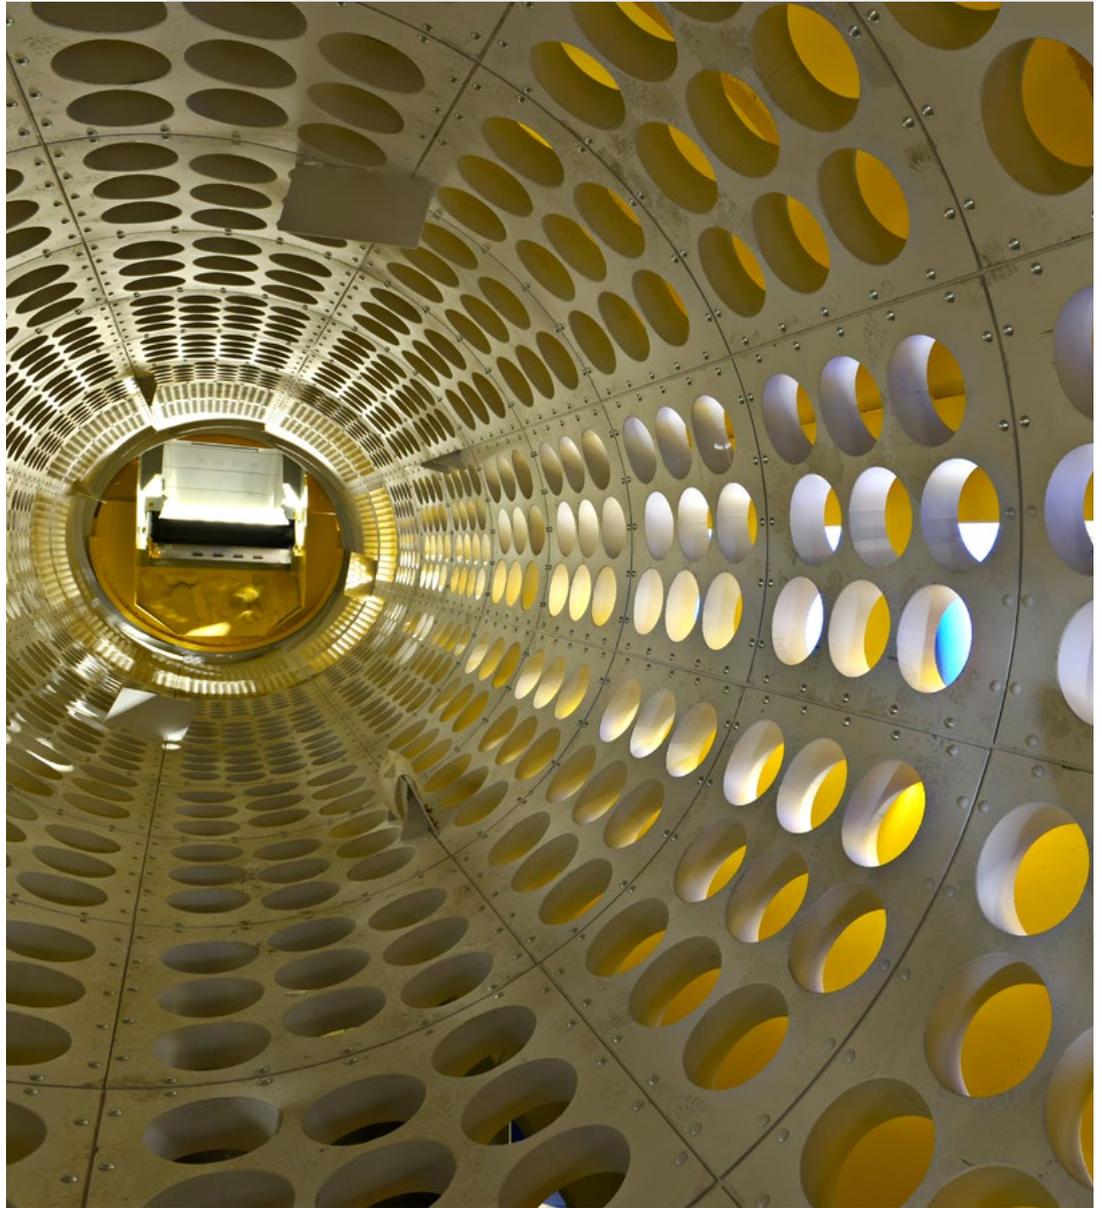

statement

A global functioning circular economy facilitated by STADLER products.

For preserving an intact environment for future generations.

Our values

STADLER is a family business that has grown over generations and thinks long-term.

Our primary goal is the sustainable safeguarding of our corporate existence. Without question, we value our employees, customers, and suppliers equally and deal on an equal footing. This fundamental understanding is also reflected in our mission statement.

Honesty

Openness and honesty is deeply rooted in our corporate culture – it has been a founding principal and we strive to continue this in the future.

Reliability

You can rely on STADLER in every respect. Responsible corporate management and securing a solid economic basis for the long-term safeguarding of the company's existence; fair jobs and long-term business partnerships are top priorities. This way everyone can feel secure.

Commitment

As a family business in its seventh generation, we feel bound to a high code of values. Down-to-earth-attitude and solidarity with our regions and communities play a central role. It is therefore pivotal for us to continuously improve our management system, to comply with law and order and to protect our environment.

Quality

STADLER stands for the highest quality and future-oriented engineering expertise. This is ensured by our qualified employees.

At STADLER we continue to practice a „Handshake-mentality“. It is a matter of importance to us to deal on an equal footing.

Respect

We trust each other. Our word is our bond; we can react quickly and with flexibility in different situations. Our long-term customer relations and work ethics support this.

Trust

Sustainability

Our products as well as our service are focused on the future. This is the only way we can continue to exist over generations.
